

THE CONTINENTAL BAR & COFFEE SHOP SYSTEM

DECORATION L

Decoration L has a classical design, with curved wooden pillars and decorative wooden panels. This stylish finish can be complimented beautifully by gold-plated rails and gold effect trimming for the glass display cases. In addition, the worktops and plinths offer a choice of vibrant granite or composite stone finishes.

Decoration L has been used to transform an old-fashioned and unprofitable café bar at Heriot Watt University in Edinburgh

Low glass format for the display of snacks

High glass format for the display of patisserie products

The Continental bar and counter units are constructed using robust stainless steel frames with ample storage space underneath the counter

The system includes optional under-bar storage refrigerators in hard wearing stainless steel to fit both bar units and display counters, complete with self-closing doors
